

# CASE STUDY

## Re-stain and re-seal concrete patio and walkway

**Objective:** Blast away failing color and sealer from concrete; re-stain and re-seal.

**Location:** Saginaw, MI

This contractor has added concrete staining and sealing to his arsenal of services.

Some services related to blasting are priming, painting, staining, and power washing. By offering one or more of these in addition to blasting, you can become a one-stop shop for your customers.

"The color in these pours were not integral. **Blasting removed the topical coloring along with the old sealer.** Used a medium gray for coloring, then antiqued it in black. The pads were then sealed with Deco Guard 25% high gloss sealer. The finished photos give the appearance that it's very dark, however in person it has a dark slate appearance."

**Tri-City Blasting and Sealing**, Tri-City Area, MI
